

Yuanyuan Hu

PhD Student, Cognitive Neuroscience

huyy@psych.ac.cn | <https://orcid.org/0000-0001-9019-6198> | <https://www.researchgate.net/profile/Yuanyuan-Hu-27> | Beijing, China 100101

RESEARCH PROFILE

I study how genetic and environmental influences shape brain networks and self-regulatory behavior, with a focus on procrastination, impulsivity, decision-making, and transdiagnostic mental-health risk. My work combines twin designs, neuroimaging, computational modeling, representational similarity analysis, and connectome-genetic approaches.

RESEARCH POSITIONING

Recommended primary positioning: Twin neuroimaging, behavioral genetics, and computational psychiatry of self-regulation and mental health.

- Genetically informed neuroimaging of procrastination, impulsivity, and transdiagnostic psychopathology.
- Computational and neurogenetic mechanisms linking decision-making, self-regulation, and mental health.
- AI-augmented psychological measurement and computational psychiatry as an emerging secondary direction.

EDUCATION

Doctor of Philosophy, Cognitive Neuroscience 03/2025 – Present

Institute of Psychology, Chinese Academy of Sciences, Beijing

Using twin data to investigate the brain mechanisms through which genetic and environmental factors influence mental health.

Supervisor: Prof. Yuan Zhou.

Master of Philosophy, Applied Psychology 09/2022 – 03/2025

Institute of Psychology, Chinese Academy of Sciences, Beijing

Using computational modelling and experimental psychology to study behavioural decision-making. Supervisor: Prof. Yuan Zhou.

Bachelor of Philosophy, Applied Psychology 09/2018 – 06/2022

Faculty of Psychology, Southwest University, Chongqing

Trained in research on procrastination. Supervisor: Prof. Tingyong Feng.

RESEARCH INTERESTS AND METHODS

Interests: Neuroimaging of psychiatric disorders; Behavioral genetics and twin studies; Behavioral decision-making.

Methods: Proficient in twin-based genetic modeling and heritability analysis. Experienced in neuroimaging and network analysis methods. Well trained in the theoretical frameworks and methodological approaches of clinical research on anxiety and depression.

AWARDS AND HONOURS

2026 Director's Scholarship, Institute of Psychology, Chinese Academy of Sciences (Top 5 institute-wide)

2026 Best Presentation Award (3/500) and Best Academic Communication Award (3/988), First Capital Universities Undergraduate Academic Conference

2025 Outstanding Student (Top 15%) and Outstanding Student Model (Top 1%), University of Chinese Academy of Sciences

2022–2025 Academic Excellence Scholarship, University of Chinese Academy of Sciences

2022 Undergraduate Scholarship, University of Chinese Academy of Sciences
